## ESS INFORMATION FOR REPORTING FACILITIES

- ESS is critically important for the State to anticipate demand in the hospital & sub-acute care setting. This data influences decisions on the need for additional support and equipment requests from federal government.
- Facilities MUST verify and update data once daily.
- ESS is adding more fields daily. Instructions on these new fields available on the AHCA ESS website.
- Hospitals should estimate the number of med surge beds that can be converted to ICU beds. Do not duplicate bed numbers in different categories. Start with highest acuity beds.
- Corporate Representatives can be established to monitor data entry at individual facilities. Contact AHCA for assistance
