MAY 26, 2020

## AFTER-ACTION REPORT AND IMPROVEMENT PLAN TEMPLATE

### After Action Report – Improvement Plan Form (AAR / IP) Evaluation of Drill / Exercise OR Actual (Real-Life) Event

This form was developed by the Big Bend Health Care Coalition in collaboration with the Florida Health Care Association (September 28, 2017), to assist Facilities with documentation of a Drill/Exercise or Actual (Real-Life) Event.

Sources used include the CMS Emergency Preparedness Rule, Interpretive Guidance, and DHS HSEEP guidelines.

The following After-Action Report / Improvement Plan (AAR/IP) template incorporates the required CMS Emergency Preparedness Rule elements described below, and includes other valuable features. The template format is designed to effectively integrate the required AAR/IP elements into a facility's overall emergency program and emergency operations plan.

### CMS EP Rule Requirements for After Action Reports

- A. **The CMS Emergency Preparedness Rule (EP Rule)** requires facilities to analyze their response to and maintain documentation of exercises, and emergency events, and revise the facility's emergency plan accordingly. The [Interpretive Guidance](#) states that facilities should "document the lessons learned following their tabletop and full-scale exercises and real-life emergencies and demonstrate that they have incorporated any necessary improvements in their emergency preparedness program. Facilities may complete an after action review process to help them develop an actionable after action report (AAR). The process includes a round-table discussion that includes leadership, department leads and critical staff who can identify and document lessons learned and necessary improvements in an official AAR. The AAR, at a minimum, should determine 1) what was supposed to happen; 2) what occurred; 3) what went well; 4) what the facility can do differently or improve upon; and 5) a plan with timelines for incorporating necessary improvement." [IG, Tag #0039].
- B. **Actual (Real-Life) Events:** The EP Rule states that if the facility experiences an actual natural or man-made emergency that requires activation of the emergency plan, the facility is exempt from engaging in a community-based or individual, facility-based full-scale exercise for 1 year following the onset of the actual event. The After-Action Report for the actual (real-life) event is also required.

## ESS INFORMATION FOR REPORTING FACILITIES

- ESS is critically important for the State to anticipate demand in the hospital & sub-acute care setting. This data influences decisions on the need for additional support and equipment requests from federal government.
- Facilities MUST verify and update data once daily.
- ESS is adding more fields daily. Instructions on these new fields available on the AHCA ESS website.
- Hospitals should estimate the number of med surge beds that can be converted to ICU beds. Do not duplicate bed numbers in different categories. Start with highest acuity beds.
- Corporate Representatives can be established to monitor data entry at individual facilities. Contact AHCA for assistance

## SURGEON GENERAL'S PRIORITIES

### Florida's 5 STEPS to Prevent COVID-19

#### 1 STOP INTRODUCTION

Stop Introduction into Florida from out of state.

#### 2 TEST, TEST, TEST

Leverage testing capabilities & work to expand capacity.

#### 3 ELDERLY & VULNERABLE PROTECTION

Protect the elderly by increased mitigation and messaging at assisted living centers, nursing homes, and other special facilities.

#### 4 PREPARE HOSPITALS

Assess the potential impacts and course of action for hospitals and bed capacity.

#### 5 SOCIAL DISTANCING

Continue to message social distancing.
