Big Bend Health Care Coalition COVID-19 SITUATION REPORT #24

JULY 1, 2020

STATEWIDE CONFERENCE CALL SUMMARY

- 1.9 million tests have been administered in the State of Florida.
- Florida has now reached over 156,000 positive COVID cases, with 14,000 hospitalizations and 3,400 deaths. Roughly 50% of all reported deaths are coming from Long Term Care Facilities, which is why it remains important to keep COVID out of these areas.
- The median age of positive cases is trending in the younger demographic, specifically the upper 30's. These individuals are showing to be less ill overall, but some are still requiring to be hospitalized.
- HHS has a new plan to allocate Remdesivir. Each state will get an allocation and DOH will then devise a strategy to distribute it. Hospitals who request it will get it shipped to them directly. More information will be coming out soon and will be communicated through FHA.
- Regional collaboration continues to be incredibly important and we encourage all facilities to continue those efforts.
- Since June 15 we have seen an increase in hospitalizations for COVID-19. With that we still have beds available and those are being monitored closely. As of now, the State of Florida is at 25% staffed beds available and 23% staffed ICU beds available.

Big Bend HCC Situation Reports will now be going out once a week on Wednesdays.

ESS INFORMATION FOR REPORTING FACILITIES

- ESS is critically important for the State to anticipate demand in the hospital & sub-acute care setting. This data influences decisions on the need for additional support and equipment requests from federal government.
- Facilities MUST verify and update data once daily.
- ESS is adding more fields daily. Instructions on these new fields available on the AHCA ESS website.
- Hospitals should estimate the number of med surge beds that can be converted to ICU beds. Do not duplicate bed numbers in different categories. Start with highest acuity beds.
- Corporate Representatives can be established to monitor data entry at individual facilities. Contact AHCA for assistance

SURGEON GENERAL'S PRIORITIES

Florida's 5 STEPS to Prevent COVID-19

1 STOP INTRODUCTION

Stop Introduction into Florida from out of state.

2 TEST, TEST, TEST

Leverage testing capabilities & work to expand capacity.

3 ELDERLY & VULNERABLE PROTECTION

Protect the elderly by increased mitigation and messaging at assisted living centers, nursing homes, and other special facilities.

4 PREPARE HOSPITALS

Assess the potential impacts and course of action for hospitals and bed capacity.

5 SOCIAL DISTANCING

Continue to message social distancing.

Did you get this report second-hand? If you'd like to be added to our COVID-19 Situation Report distribution list, please email your contact info to Zach Annett at zannett@arpc.org
